EDUCATION

Federal University of Pernambuco (UFPE) – Center for Informatics - Bachelor's Degree in Information Systems

March 2026 – Present (Expected: December 2029)

Undergraduate program focused on systems development, software architecture, databases, requirements engineering, project management, and technological innovation.

Gran Faculdade - Technology Degree in Data Science

2026 – Present (Expected: 2028)

Undergraduate technology program focused on databases, data visualization, artificial intelligence, and programming languages, with optional tracks in Big Data and AI and in Business Intelligence.

Federal Institute of Pernambuco (IFPE) – Jaboatão dos Guararapes Campus - Technical Program in Systems Development (Integrated with High School)

March 2023 – January 2026

Technical program integrated with high school, focused on programming, databases, web development, programming logic, and software testing.

PROFESSIONAL EXPERIENCE

Freelance — Systems Developer (January 2026 – July 2026)

- Achieved 100% improvement in commercial and financial management for Gerens Partners Group by developing web systems in JavaScript, integrating APIs, and structuring databases.

PROFESSIONAL PROJECTS

Inout — Operations and Financial Management System (Gerens Partners)

Web system that centralizes clients, orders, service requests, invoices, and the full financial area: accounts payable and receivable, commissions, cash flow, income statement (DRE), and ABC analysis, with PDF reports and role-based permissions.

Technologies: React, Node.js, Express, Sequelize, PostgreSQL.

GIC IM — CRM and Market Intelligence (Gerens Partners)

CRM with kanban sales funnels, configurable stages, cards with custom fields, tags and assignees, activity history, notifications, PDF funnel reports, and per-user permissions.

Technologies: React, Node.js, Express, Sequelize, PostgreSQL.

SKILLS

JavaScript (React, Node Js, Cypress)

SQL

Git & GitHub

Python (Data Science)

AWARDS

Silver Medal — Junior Category, Pernambuco Informatics Olympiad (OPEI 2025)

Gold Medal — Junior Category, Pernambuco Informatics Olympiad (OPEI 2024)

LANGUAGES

Portuguese: Native / Fluent

English: Intermediate reading, basic writing, and Intermediate speaking

Institutional Recognition

Academic distinction during high school at the Federal Institute of Pernambuco (IFPE) – Jaboatão dos Guararapes Campus, Technical Program in Systems Development (Integrated with High School)

RESEARCH

Animal Localization in Pastures with LoRa: Machine Learning vs. Analytical Methods (CIn – UFPE)

August 2026 – Present · Advisor: Prof. Victor Wanderley Costa de Medeiros

Compares fingerprinting with RSSI/SNR (KNN, random forest, and neural networks) against classical analytical methods (RSSI trilateration and TDOA) in pastures with irregular terrain and sparse gateway coverage, measuring localization error, signal variability throughout the day, and the minimum calibration effort required.

Technologies: Python, scikit-learn, PyTorch, Pandas, LoRa.

ACADEMIC PROJECTS

PIBEX Extension Project (IFPE) — Developer

Developed technological solutions for *Abrigo Cristo Redentor*, participating in requirements gathering, feature implementation, and automated testing. Worked collaboratively using version control with Git and GitHub.

Technologies: React, Node.js, SQL, Cypress.

Community Library of the Integrated Health Service (SIS – UFPE) — Extension Project

April 2026 – Present

Taking part in the implementation of the community library of UFPE's Integrated Health Service, developing automations for the library's management routines.

Programming I / Programming Logic Teaching Assistant (IFPE) — Teaching Assistant

Supported students in learning programming logic, assisting with exercises and practical project development. Focused on JavaScript and strengthening students' foundational programming skills.
